6) Subd with refer to paras 3 and 4. The total estimate asked for sanction is Rs 75000. The details regarding the estimate are furnished in the Report accompanying the estimate Marg Q. The estimate has been prepared by the Municipality and is now scrutinised by the Chief Engineer.

The finances of the municipality as given by the Budget sanctioned for the current year are as follows:—

Opening Balance		37,854
Receipts Normal	67430	
Special	60400	127,830
Total		165,684
Expenditure Normal	62673	
Special	90677	153,352
Closing Balance		12,332

7) The estimate further provides for an expenditure of Rs 45,500 on account of improvement of water supply and formation of roads etc in the extension. Govt in approving of the provision have asked ~~[illegible]~~ Rs as per para 14 of the G.O. Marg P that in view of the fact that the estimated receipts include an uncertain income of Rs 832,- from sale of sites, the provision of Rs 45,500 will be retained subject to the condition that all the expenditure

10) The Municipal Council want to start the project amounting to Rs 75,000 for the improvement of the water supply to the Town owing to the formation of the new extensions & other circumstances. The Chief Engineer has pronounced the Estimate to be in order & considers that the work should be executed by the P.W.D. as it is of a highly technical nature.

11) The Council propose to meet the sum from the following sources:-

1) Govt grant Rs 25000/-
2) " Loan Rs 25000/-
3) Value of old materials Rs 25000/-
Rs 75,000.

12) The sum of Rs 50000/- (Govt & Loan) has sanctioned to meet the cost of the improvements in all directions.
It is stated that the improvements required in these directions need not be provided at once and that only the immediate & pressing requirements need be provided for, which may not cost more than Rs 50,000 realised by sale of old materials. The Commr requests that the above may be approved in his Consideration.

13) The Council also request to realise the amounts in about 10 years from the levy of Rs 2/- per mensem for each house connection for which they

IMPROVEMENT OF SHIMOGA WATER-SUPPLY.

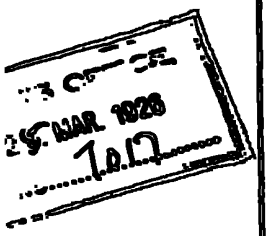
22 With his letter dated the 17th August 1925, the Deputy Commissioner, sent up an estimate for Rs.75,000 for improving the water supply of the Shimoga Town. The work is reported to be very urgent and several reminders, some even in the form of telegrams-, have been received. Today the honorary Vice President of the Municipality saw me and requested that sanction to the estimate might be expedited.

23 The question of financing the scheme has already been solved. Government have sanctioned a grant-in-aid of Rs.25,000 and the amount was also permitted to be drawn by the Municipality last year. Another sum of Rs.25,000 has been sanctioned in the form of a loan to the Municipality. The balance of Rs.25,000/- the Municipality has offered to find from the sale ~~proceeds~~ proceeds of sites. Such proceeds amounting to about Rs.29,000 have already been reported to be realised. The problem of finance therefore does not present any difficulty.

24 The estimate sent by the Deputy Commissioner is that prepared by the Chief Officer of the Municipality who is an Engineer lent by the Public Works Department. This estimate was referred to the Chief Engineer for scrutiny and he has certified that it is in order and that it may be sanctioned. He has however added that execution may be entrusted to the Public Works Department This arrangement may be approved; but the Department need not make any charge for establishment and Tools and Plant. One of the Officers

Serial No

of the Public Works Department itself will be in immediate charge of the works of the Chief Officer of the Municipality, and the supervision by the Public Works Department in these circumstances will only be general and no percentage claim need be made for general supervision.



25 In the circumstances stated above, the estimate may be sanctioned. The case may be ordered to be disposed of by circulation, and a D.F.N. will be put up after the circulation is completed.

Final Note by the Second Member of Council.

Subject:

Improvements to the ~~present~~ Shimoga water-supply.

These papers relate to the proposal for improvement of the existing water-supply to the Shimoga Town.

With his letter dated the 17th August 1925, the Deputy Commissioner, Shimoga District, submitted for the orders of Government plans and estimates received from the President, Town Municipal Council, Shimoga, for improving the present water supply to the town. A note explaining the proposed improvements in detail accompanied the President's letter.

The water supply to the Shimoga town is at present precarious and many break-downs are said to have occurred in the past two or three years causing a great deal of inconvenience to the public and exposing them to the risks incidental to the use of river water which, during the summer months, gets unhealthy and contaminated. This is a situation which calls for a very early remedy. Besides, the formation of new extensions in the Shimoga town in order to provide accommodation for persons rendered homeless owing to the recent floods, has added to the urgency of the need for a proper water-supply to the town. It is accordingly proposed by the Municipal Council to instal a duplicate engine and pump at the Shimoga Water Works and this duplication of the plant together with the other improvements indicated in the President's letter will, it is expected, place the existing water-supply on a satisfactory basis and also extend its benefits to the extensions that have been newly formed.

The new project is estimated to cost Rs.75,000 and the Municipal Council propose to meet the sum from the following sources:-

1. Grant-in-aid of Rs.25,000.) Sanctioned by Government to the Mu-
2. Loan of Rs. 25,000.) nicipality in April 1925.
3. A sum of Rs.25,000 out of the amount realised from the sale of sites in the new extensions.

Under the third head, the Deputy Commissioner has reported that a sum of Rs.43,388 is expected to be realised from the sale of sites, out of which Rs.29,000 are reported to have already been collected. The sum of Rs. 50,000 (Government grant and loan) referred to above was sanctioned to the Shimoga Municipality for meeting the cost of improvements in all directions necessitated by the havoc caused by the floods, and not mainly for improving the water supply. The President states, however, that as regards the other improvements required for making the extensions habitable, necessary provision has been made out of the money realised from the sale of sites, and that the proposed expenditure on the improvement of the water-supply will not starve the other requirements of the extensions or make them unpopular in any way. The Municipal Council expect to realise the amount proposed to be spent on the project in about ten years from the levy of a flat rate of Re.1 per month for each house-connection calculated on the basis of 300 applications for such connections of 4,000 houses in Shimoga.

The project has been approved by the Municipal Council and the leading citizens of the town assembled in public meeting are stated to have supported it, and the Deputy Commissioner strongly recommends that it may be sanctioned. The estimate was sent to the Chief Engineer for scrutiny and he has certified that it is in order and may be approved. He has, however, suggested that the execution of the work may be entrusted to the Public Works Department, as it is of a highly technical character.

When the papers came before me, I examined the whole question with reference to the financial position and other commitments of the Municipality and noted as follows:-

"The question of financing the scheme has already been solved. Government have sanctioned a grant-in-aid of Rs.25,000 and the amount was also permitted to be drawn by the Municipality last year. A sum of Rs.25,000 has been sanctioned in the form of a loan to the Municipality. The balance of Rs.25,000 the Municipality has offered to [illegible] from the sale proceeds of sites. Such proceeds [illegible] to about [illegible]

Rs.29,000 have already been reported to be realised. The problem of finance therefore does not present any difficulty.

The estimate sent by the Deputy Commissioner is that prepared by the Chief Officer of the Municipality who is an Engineer lent by the Public Works Department. This estimate was referred to the Chief Engineer for scrutiny and he has certified that it is in order and that it may be sanctioned. He has, however, added that execution may be entrusted to the Public Works Department. This arrangement may be approved; but the Department need not make any charge for establishment and Tools and Plant. One of the officers of the Public Works Department itself will be in immediate charge of the works as the Chief Officer of the Municipality and the supervision by the Public Works Department, in these circumstances, will only be general and no percentage claim need be made for general supervision.

In the circumstances stated above, the estimate may be sanctioned.

The Dewan and the First Member of Council have concurred in the above view and I solicit the gracious sanction of His Highness to the estimate for Rs.75,000 for improving the ~~existing~~ water-supply to the Shimoga Town.

M S Venkatarao
MEMBER OF COUNCIL.

Deputy Commissioner,
Shimoga District.

AUG. 1925 SECTION.

To,

B. Nagappa, Esquire, Bar-At-Law,
Secretary to Government,
Local and Legislative Departments,
Bangalore.

Sir,

I have the honour to forward herewith, letter No: 192 dated the 8th Instant, together with its enclosures in original received from the President, Shimoga Town Municipal Council, regarding the sanctioning of an estimate for Rs 75000/- for the improvements to the existing water-supply to the town of Shimoga. The letter of the President and the report on the project explain the facts of the case fully and clearly. The success of the extensions formed depend to a considerable extent, on the facilities to be given in the matter of water-supply. From the figures furnished it will be seen that the scheme is likely to be a remunerative one though in cases of the kind, which concern the very necessities of life the question of profit and loss should have no consideration. The Municipal Council is sanguine of realising, from the sale of sites, an amount which would be sufficient for the formation of the extensions. In case of new extensions all the required improvements such as drains, culverts, markets and other public buildings cannot be made in one period. Such improvements will have to be spread over a number of years and this, I am sure, the Municipal Council will undertake to do. Even in bigger Municipalities

it is, I believe, this procedure that is adopted. The water-supply at present is precarious and many break-downs occurred during the past 2 or 3 years causing good deal of inconvenience to the public and exposing them to run the risk of drinking river water which gets unhealthy and contaminated in summer season. The duplicating of the plant is very necessary to place the present supply on a satisfactory basis and extend its benefits to the new extensions. As regards the immediate improvements required for the new extensions the Municipality as aforesaid, has already embarked to do the same. The expenditure which is now proposed to be incurred, for which ways and means have been shown, will neither starve the extensions nor make them unpopular in any way. On the other hand, the creation of water facilities will speed the building of houses. In these circumstances, I request you to be so good as to obtain the sanction of Government for the estimate. If need be, Government might be pleased to make a reference to the Chief Engineer for further scrutiny of the plan and the estimate. It may be noted, for the information of the Government, that the Chief Engineer had kindly deputed Mr. Sreenivas Iyer to attend the informal meeting of the Municipal Councillors and some leading citizens of Shimoga and study the scheme and express his views. Mr. Sreenivas Iyer examined the project carefully and advised the council to accept it. I request that Government might be pleased to pass early orders on the proposals.

I have the honour to be,
Sir,
Your most obedient servant,

Deputy Commissioner,
Shimoga District.
